Cross Compliance Soil Protection Review

(continued)

Use the following table to indicate any problems that you observed in 2009, and any changes you will introduce in 2010.

Section 5 Review of soil issues and problems in 2009 and actions planned for 2010

Were these particular problems in 2009?	Yes	No	If yes, identify the fields or blocks of land where the problem occurred	If yes, indicate what you will do differently in 2010. If you will not be taking any extra measures you should give reasons
Low soil organic matter – as indicated by soils that cap and slump easily or are difficult to cultivate				
Compaction due to cultivations				
Damage due to other mechanical operations on wet ground (NB: This is not necessarily the same as the situation covered by GAEC 3, which relates specifically to WATERLOGGED soil)				
Runoff or water erosion from arable land				
Runoff or water erosion from grassland				
Wind erosion				
Poaching of soil by livestock				
Please add here any other issues you wish specifically to include
